Section 6: AI Marketplace Web Page Content

Field	Description
Product Name / Header	CPT® Data Licensing for Practice Fusion & Veradigm® Systems
Short Description (80 chars)	<i>One sentence elevator pitch to describe the product – do not need to rename the product in this description</i> Annual CPT® data licensing made simple for Veradigm® and Practice Fusion users.
Overview (up to 425 chars)	Optum works on behalf of the AMA as the exclusive authorized distributor and licensing agent of CPT® data for organizations using Practice Fusion and Veradigm® clinical and administrative systems. Renew or initiate your annual CPT® Standard Data File license to stay prepared for 2026 coding updates and compliant with required licensing terms.
Call to Action	Order now
Pricing (optional)	Annual fee is based on the AMA Ambulatory EMR User Proxy Model using billing provider count.

Commented [EB1]: Pulled from Medical APIs page. Please review to ensure it applies to and is accurate for Dental.

Commented [GD1R2]: remove "automated"

Formatted Table

Section 7: Benefits (≤ 3)

Highlight the benefits to the customer:

Exclusive authorized licensing support	Work with Optum as the exclusive authorized distributor and licensing agent for CPT® data used in Practice Fusion and Veradigm® systems, helping your organization stay aligned with AMA licensing requirements.
Simple annual renewal process	If your organization previously purchased the CPT® Standard Data File from Optum, you can use the online order process to quickly renew your annual license and access the 2026 data file.
Standardized pricing model	Pricing is determined by the AMA Ambulatory EMR User Proxy Model, which estimates usage by multiplying the number of billing providers in the practice by four for a consistent, industry-standard licensing approach.

Commented [EB2]: Pulled from Medical APIs page. Please review to ensure it applies to and is accurate for Dental.

Commented [GD2R2]: Looks good.

Section 8: Video (Optional)

Field	Description
Video Title	Name of video
URL & Thumbnail	Link to hosted video and image
Supporting Details	2–4 bullets or sentences

Section 9: Modules (≤ 5)

Modules for product:

Included modules	CPT® Standard Data File licensing and renewal support for Practice Fusion EHR, Veradigm® Professional EHR™, Touchworks EHR, and Veradigm® Practice Management.
Practice Fusion EHR	Annual CPT® Standard Data File licensing required for organizations using Practice Fusion EHR.

Veradigm® Professional EHR™	Supports annual CPT® data file licensing for Veradigm® Professional EHR™ users.
Touchworks EHR	Included as a covered system requiring CPT® Standard Data File licensing renewal.
Veradigm® Practice Management	Annual licensing support for CPT® data used in Veradigm® Practice Management workflows.

Section 10: Related Resources / Outcomes

Repeat for each resource:

Commented [EB3]: Don't have currently. Will add at a later date.

Section 11: FAQs

Repeat for 3–5 questions:

Commented [EB4]: I pulled from the Medical APIs page. Please review to ensure it applies to and is accurate for Dental.

Who must renew this annual CPT® data license?	This annual renewal and corresponding licensing is required for care organizations using Practice Fusion EHR, Veradigm® Professional EHR™, Touchworks EHR, or Veradigm® Practice Management.
What is CPT® and why is it needed?	CPT® is the American Medical Association's standardized coding system for medical services and procedures, widely used to report care for reimbursement, research, utilization analysis, and healthcare documentation.
How is pricing determined for the license?	The annual fee is determined by the AMA Ambulatory EMR User Proxy Model, which approximates the number of users by multiplying the number of billing providers in the practice by four.

What if this is my organization's first order with Optum?	If it is a first-time order from Optum for your organization, or you are a first-time purchaser for an existing client organization, the page directs you to call customer service for assistance.
What year of CPT® data is this page supporting?	The source page is positioned to help organizations prepare for upcoming 2026 procedural coding and billing updates through the 2026 CPT® Standard Data File.

Section 12: Featured Product Detail & Navigation

Description used on carousel, category tile, and navigation description

Eligibility API

The Eligibility API uses the standard X12 EDI 270 eligibility transaction, and formats it in JSON for an HTTP request. It makes this popular X12 transaction set more accessible to developers and to users' applications.

We manage the X12 standards behind the scenes and give you efficient access to medical subscriber or dependent plan membership, copays, coinsurances, deductibles and more in an easy-to-use, human-readable format.

Packages starting as low as

\$200/month

View pricing

7

Up-to-date support

We support a dedicated X12-formatted Eligibility API to send your information in X12 EDI format. It supports the standard syntax for a complete X12 EDI 270 transaction.

Thorough

Our Eligibility API solution provides complete patient profile and benefits information to support healthcare delivery and more efficient and accurate reimbursement.

Efficient reporting, monitoring and audit support

Payers will find claims spend less time in pending status and will see fewer rejected and resubmitted claims.

E book

Unlock hidden revenue with smarter coverage discovery

This e-book reveals a 3-step strategy to reduce denials, uncover missed insurance and boost collections - without adding IT burden.

11

Frequently Asked Questions

Q How do I enroll so my payer accepts my eligibility requests?

Q Can we enroll more than one provider under a single NPQ/leapayer ID? Or will one provider per office work for eligibility under the TIN?

Q Do you have a sandbox that I can test before signing a contract?
